We continued to see call volume increasing as restrictions are continuing to have less and less impact on department operations. This year the department reached a new record for calls for service for the year. This number was **122** calls ahead of last years.

Our daily call average for the month of February is over 12 calls per day.

We are also seeing a major increase in back to back calls. We will begin tracking this in 2022 in our efforts to remain proactive to changes in our community.

As we completed the month, we continue our efforts to meet calls for service. We look forward to working with our neighboring departments as we partner together to meet the needs of our communities. Mutual Aid continues to be a cost-effective means for all area fire departments to deal with surges in requests for service. You will note an increase in the number of calls we are using mutual aid. We all try to maintain resources capable of meeting our average needs. However, we all need to have in place a plan to address unexpected requests.

Public Relations

We continue working to return to a more active interaction with the community. We will continue to take precautions but will look at resuming additional activities in coming months.

Training

Every day we have training scheduled. These trainings are predetermined by the training division. We have day shift training and night shift training therefore every member receives appropriate training hours throughout the year. This also helps to keep our ISO rating favorable. Training has returned to hands on operations. As we work to return to more normal operations, we have begun to get crews back to hands on operations.

Members trained on Fire Behavior, Difficult Airway Maintenance, SCBA Use, and Ice Rescue Incident Command and the Township Policies. Staff also completed online educational trainings as well.

Fire Prevention

Our fire prevention officer has been assigned to a shift since he was hired. However he continues to conduct business inspections and home inspections.

Inspections Completed:

Business Inspections: 3

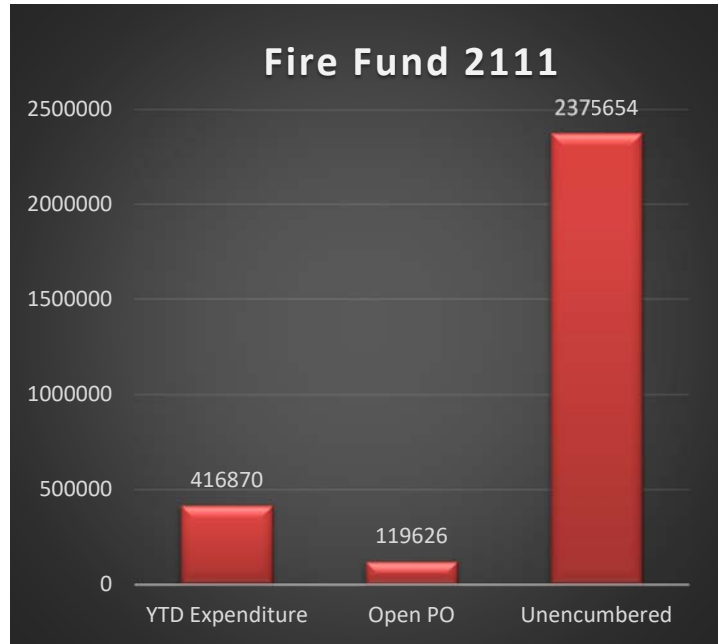

Home Inspections: 2

Residential Knox Box: 1

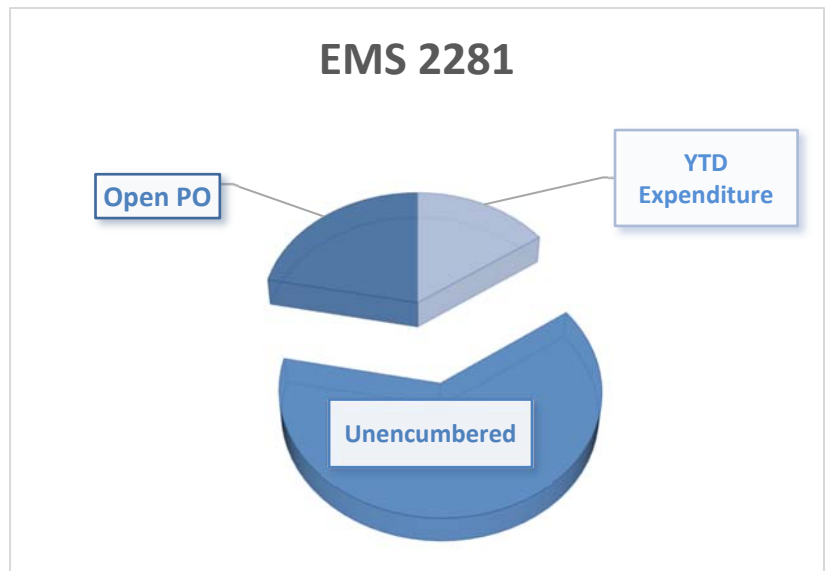

Some of the things that are looked for while inspections are completed include, blocked exits, surge strips plugged into other surge strips, exit lights not working, fire extinguishers serviced and many more.

The Inspector will return to the day turn Assignment on the 21st of March.

COVID – 19

The Medical Director continues to recommend that our staff wear surgical masks for patient contact. For suspected COVID-19 patients he is recommending an N-95 mask be worn.

As the number of cases continues to decline the State and County recommendations continue to ease. We are continuing our disinfection practices and will continue to use our UV equipment to maintain a healthier environment for our patients and staff members.

We continue to keep track of current information on the new variants and what changes to our operations are needed to combat the variants.

We also continue our efforts to make sure we maintain adequate supplies.
